Born to Command – not to take orders – The Brooks Family of Balbinia station – Pioneers of Israelite Bay, Western Australia by John Simpson
*ISBN 978-0-85905-647-2, (New, 2017), A4, illustrated, indexed, 146 pp, 420grams, \$40.00**

The saga of the Brooks family on their isolated station on the edge of the Nullarbor shows the great spirit of settlers in opening hard new land. John Paul Brooks, his sister Sarah, and mother Emily, spent most of their life in physical isolation but kept up international correspondence and cooperation with botanists and geographers. This is an important biography of a family that shows success is not always the reward for hard work. Only a few of those who ventured created long lasting establishments. Not giving up in the face of great adversity is an achievement which must be honoured, recorded and disseminated as an example for others who may feel overwhelmed by their situations.

*ISBN 978-0-85905-687-8, (New, 2017), A4, 100pp, illustrated, 290 grams, \$30.00**

Beyondie Station at Kumarina, north of Meekatharra, was taken up in the 1920s by Bob George, a Rabbit Proof Fence boundary rider. He protected a young part-Aboriginal girl, later marrying her. Yibbie had ten children with Bob George and later attachments, and most were sent by Bob to Sister Kate's home in Perth for their education. Of the children today, two of the girls survive. One is a Perth lawyer, and the other, Evalene, was involved in a pastoral life. This is the interesting story of growing up in the wildest bush and in the equally feral children's home. The George family were well-known in the upper Murchison/Gascoyne region and this autobiography is an interesting and important reflection of life in that country. It was written by 2003 but ignored by publishers, perhaps because its content was not considered abrasive enough in the 'culture wars' of that time. Published 19 December 2017.

'Brumby' Leake by Peter J Bridge
*ISBN 978-0-85905-591-8, (2015, New), A4, 86pp, illustrated, 255 g, \$25.00**

Brumby Leake was one of the great characters of the early Murchison-Gascoyne. His dalliances with the spinifex fairies and concern for the orphaned calves of other people cattle, together with an appreciation of the qualities of a stray horse, led to a certain mystique. This was heightened by the power of his enemies who almost invariably lost in the court cases which followed some of his exploits. The dreaded A.O. Neville led a campaign to incarcerate him. But he was much loved by the aboriginals that worked for him. This biography is mainly from the DIA and police files that have survived against all odds, together with old newspaper accounts and reminiscences of old timers. Part of Brumby's reputation derives from the iniquitous K.S. Prichard who cast him as the lead character in *Coonardoo* and *Brumby Innes*. In both these agitprop outbursts attacking Brumby she carefully avoided her powerful family friends who were infamous for their predatory and abusive behaviour towards the local aboriginals. Guaranteed to raise a cackle and a gasp.

One hundred years ago over two hundred and fifty railwaymen from across the state left Australia for the Western Front. Many were over age and some of doubtful fitness but they went because they felt they were needed. For more than eighteen months sometimes under German artillery fire they operated railways carrying vital men and supplies for the British army. Largely ignored by the Australian Official Histories of World War One, this is their story.

The history traces the events and decisions that led to the raising of Australian Railway Units for service with the AIF and follows the path of this particular unit from its formation in Western Australia through its service on the Western Front to its eventual return home. While recounting the unit activities in the context of World War One events, equal emphasis has been placed on the stories of many of the individuals who comprised the unit.

Crosscut's War – The life and times of a Gallipoli soldier. Thomas Henry "Crosscut" Wilson by Chris Holyday

ISBN 978-0-85905-652-6, (New, 2016), A4, 79 pages, illustrated, indexed, 240 grams, \$30.00*

Thomas Henry (Crosscut) Wilson was a mate of Henry Lawson. He came West in the 1890s in quest of gold but instead struck a very rich vein of literary success along the inky way. This book brings together some of the most lively and vivid word pictures that Wilson wrote over a very prolific period that ultimately shaped the very character of our whole nation, including his participation in the Gallipoli campaign with the 16th Battalion. And it tells the back-story of Crosscut, the man, mainly gleaned from his own writing. The reader should beware, however, for Wilson was a larrikin at heart, could mix fact with fiction and had a definite weakness for beer combined with a wanderlust that would see him drift all over Western Australia. He was also a very fine writer, amongst the top shelf of those colourful characters that had drifted West chasing the weight, and stayed to help build the State we know today.

This book includes some of his finest freelance reporting during the Gallipoli campaign.

GWF. THE LETTERS OF A NATIVE WELFARE OFFICER. 1959-1961 Pilbara And Kimberley. Edited By Nan Broad.

ISBN 978-0-85905-673-1 (New, 2017), 278 pages, A4, Illustrated, 700 grams, \$50.00*

For the indigenous population of the North West of Western Australia the early 1960s held great promise and inevitable disappointment. Social welfare systems went into practice and some of the class barriers started to crumble. Against this progression the entrenched colonial superiority of the pastoralists continued them to dictate employment methods. In this see-sawing milieu Bill Courtney takes up an appointment as Native Welfare Officer in Port Hedland and later in Halls Creek. His first brief is to remove Don McLeod, instigator of Simdan, the mineral prospecting company in Pilbara which has gone broke. He then takes over as the sole officer in Halls Creek, servicing East Kimberley. Courtney's erudite correspondence to a friend during these periods contains it all - his reactions to every aspect of the uniquely individual lifestyle practised by the 'white fellas' and, both funny and sad, the reactions of the 'black fellas.'

For the 100th year of the Uni of WA. the The Hackett Memorial Buildings at The University of Western Australia, was written by Emeritus Professor John Melville-Jones. The book then describes the architecture and decoration of these buildings, and includes some stories of events, serious and not so serious, that took place in and around them.

There is at the present time a considerable redistribution of populations taking place in the world, with the consequent redistribution of disease from endemic to non-endemic areas and to susceptible populations.

Havens of Refuge is the history of the incursion of inhabitants from S.E. Asia into the north of Western Australia in pearling days, and the subsequent development of leprosy in the indigenous susceptible population. The book does not deal with clinical details, but with the history of events relative to the introduction of leprosy, its spread and the efforts to contain it, based on and largely told in the words of contemporary observers and administrators, and it illustrates the fallacies of contemporary thought, now in danger of being repeated.

ISBN 978-0-85905- 638-0, (New 2016), A4, 312 pages, illustrated, softcover, 840 grams, \$60.00*+

This is a book that I really did not want to write because I had hoped that the journey of community-school transformation and empowerment that was commenced in 1991 in Warakurna would have gone much further and it would have dwarfed the tentative steps that were made at that time.

Unfortunately, it may be argued that the empowerment of Aboriginal people over their school Warakurna or anywhere in the Ngaanyatjarra Lands of Western Australia has probably gone backwards. I have therefore written this book as an historic reminder to readers of what can be achieved by people who have a mind to work cooperatively and in humility towards achieving community aspirations.

From the Foreword by Major General (Retd) The Honourable Michael Jeffery, AC, AO(Mil), CVO, MC:

"Major Trevor Tough, himself a long time member of the Squadron, has written an informed, detailed and at times passionate account of the Squadron and its people spanning the first 20 years of its establishment in 1981. Characters abound as the author takes us informatively and interestingly through the myriad of specialised skill sets required of a NORFORCE soldier.

And so the book proceeds on a journey describing Trevor's interesting and often hilarious 20 years' service; his anecdotes enlivened with very good and quite unique photographs of men, equipment and an uncompromising hinterland that can only be mastered by true bushmen soldiers.

Dr Lawson Holman lived in Derby from 1956 until the end of 1970. He related many entertaining stories and interesting incidents which provide intriguing glimpses of characters and life in the Kimberley in those days. These forming the bulk of the book, are woven into the story of his life. It's a yarn with all the necessary human-interest ingredients – adventure, drama, pathos and tragedy – but, most importantly, it's a collection of wonderful down-to-earth Australian humour which provides a succession of belly-laughs. To enlighten his family and friends back home about life at Swan River he wrote lengthy 'sketches' including descriptions of Perth and its lifestyle plus reports of visiting the Aboriginal prison on Rottnest Island, fighting a bushfire on Mount Eliza, visiting the caves at Yanchep, and sitting in at a session of the Legislative Council. He also included a description of seasonal changes at Lake Monger and a lengthy portrait of an Aboriginal youth called Warrup, his manservant.

ISBN 0 85905 297 4, Soft Cover 204pp, 270grams, \$30.00.

The hardships of men in the pearling industry in the northwest of Western Australia. Many of these men were never to see their homelands again and were buried in lonely, mostly unmarked graves, scattered along the vast distances of the northwest coast or consigned to the depths of the sea. Divers, tenders, crew members, shellopeners, skippers and owners all paid the ultimate price through carelessness, wild nature, storms and cyclones. More than a thousand deaths with hundreds of luggers, schooners and ketches wrecked, all for the price of a pearl."

Prisoners of the Past. Compiled by Calliope Bridge, Celene Bridge, Angela Teague, Mark Chambers & Tom Hogarth.

ISBN978-0-85905-657-1, (New, 2017), A4, fully illustrated and indexed, 329 pages, 900 grams, \$60.00*

All the mugshots of prisoners released from Fremantle Gaol from 1899 to 1919, over 3850, and fully indexed. A unique picture of the past showing the features of those who had transgressed. Interestingly, non-Europeans, apart from the obligatory Aboriginals, form a far larger proportion of the prisoners than their kind would represent as a percentage of the whole population. That certain elements do not obviously appear to be represented should not be taken as any indication of their lack of criminality. It may be that they were imprisoned for longer terms for more serious crimes and so do not appear in among the more general riff-raff with the frequency that might expected by their general behaviour. Early feminists are there in their glory, proclaiming their equal rights to criminality. (The publisher's great aunt among them).

This ground-shaking report of a century ago changed goldfields life forever. While referred to multiple times in the daily rags there are no copies in the government library system, including the Battye. It may be that, like the Belgian governments investigation of Herbert Hoover's crooked rorts, all copies were purchased and destroyed. Luckily a single copy surfaced from which this copy is produced in a small run. 5707 questions asked but few real answers were given. Many leading GF men decided it was wise to have a holiday for the duration of the investigation. This is the precursor the a book on gold stealing due out shortly.

John Alexander Williamson, 1886 – 1971, was born at Bonnyrigg, Scotland and emigrated to Australia in 1911. His life as a migrant, struggling to get a start, is detailed in an appendix to this book. Williamson enlisted in the AIF in 1916, on his second attempt, and served in the 48th Battalion in France. As many other Westralians did in the tween wars years, Williamson tested his writing skills in The Western Mail columns. Under the non-de-plume of "Don Zed (48th), Perth" he published anecdotes and reminiscences of his war experiences. One of these has been included as an appendix.

ISBN 978-0-85905-654-0, (New, 2017), A4, 86 pages, well illustrated, 255 grams, \$30.00*

This is an historical novel, based on fact and brimful of the adventures, trials and triumphs of one pioneering family – the Gadens. In 1923 with two small babies, aboard the lugger "Chantress", their adventurous father and his brave-hearted wife headed into the uncivilised part of Australia now known as Kakadu National Park, only to find themselves living in "bough sheds" at the mercy of tropical cyclones, buffalo bulls, fierce snakes and primeval crocodiles, to mention a few of their hazards. Add to this a daughter Madge, who was not only a gifted pianist, but also a "darling". She touched the hearts of many, world-wide, when leprosy struck both her and her father. Top this with the inferno of World War Two as Madge, the mixed-race patients and their carers on Channel Island in Darwin Harbour faced the bombing of Darwin. History leads us through a record of man's inhumanity, but also man's humanity to man.

Thenceforth it passed rapidly from hand to hand until it was lost to view, but during its travels it brought death to at least four men who had never even set eyes on it!

Up the Carob Tree is a novel firmly based in Western Australia. Related through the eyes of a growing child, it tells the story of a family living on the outskirts of 'an ordinary little country town' that remains nameless but could be anywhere the reader wishes to place it: anywhere with 'majestic' grain silos and a milk bar called the Rotunda with a juke box that works 'most of the time.' In due course there's a Drive-In and a new fangled establishment called a 'motel.' The four neighbouring blocks on East Quarry Road where the family lives are taken up by an assortment of people, all from 'somewhere else' with their different and colourful, sometimes mysterious backgrounds and circumstances that are of endless interest to a curious child.

Wanjina Beings – among the most distinctive of all the Aboriginal Ancestral Beings depicted in Australian rock art – have been a topic of conjecture among Western scholars since their discovery by the explorer George Grey in the northwest Kimberley Region of Australia, in 1838. Their origins have at various times been ascribed to travellers from other continents and even extraterrestrial sources.

This essay presents a brief history of past research into the Wanjina cult of the Kimberley: and examines some of the core mythology that embraces the country of the Wanjina and which links people, from the coasts lapping the Timor Sea, to the fastness of the Kimberley Plateau.

Books of this calibre are rare, as is the capacity for researchers to produce such volumes of useful data.

The volumes are also an important bibliography of bush history from the earliest colonial times to the near present.

ISBN 978-0-85905-676-2, (New, 2017), 129 pages, A4, Illustrated, 400 grams, \$30.00*

From steamships to suffragettes: In attempting to understand the strange wreck of Western Australia's first colonial steamship SS *Xantho*, maritime archaeologist M. (Mac) McCarthy needed to get into the mind of its owner and operator Charles Broadhurst. Reviled and dismissed by his peers and most historians, Broadhurst was found to be Western Australia's first and foremost colonial entrepreneur, fore-runner to the famous, and in some cases equally controversial, Claude de Bernales, Laurie Connell, Alan Bond and Robert Holmes à Court. Though creative, extremely hard-working and far-sighted, he failed at almost every turn – as a pastoralist, pearler, steam-ship owner, fish canner, MLC and guano merchant. Attention then turned to his wife Eliza Broadhurst a talented musician, teacher, headmistress, actor and feminist, then to their fabulously rich son Florance Constantine Broadhurst, an enormous success in the mining industry. Then attention turned to others in the family and finally to their youngest daughter Katherine, one of Western Australia's two Suffragists, her beliefs so strongly held that she was imprisoned and required to be force fed with others of her kind in Britain's infamous Holloway Prison.
